Register here: <https://pci.jotform.com/form/260403919093154>

Session Topics

April 6: Rain to Rainbow

Follow water from sky to ground as we explore rain, erosion, and the water cycle. Students experiment with rainwater and discover how rainbows form.

April 13: Fire: Heat, Light & Change

Learn how fire works and why safety matters. Students explore heat, light, and change through simple combustion experiments and projects.

April 20: Hidden Worlds of Vernal Pools

Discover the hidden life of vernal pools and the animals that depend on them. Students explore life cycles, metamorphosis, and seasonal habitats through hands-on activities.

April 27: Feathers, Flight & Springtime

Explore birds, eggs, and nests while learning how birds grow, fly, and migrate. Students observe local birds and discover how animals meet their needs in spring.

May 4: From Seed to Canopy

Dig into plant life by exploring seeds, leaves, and trees. Students learn how plants grow, make food from sunlight, and spread seeds through hands-on projects.

May 11: Tiny Creatures, Big Jobs

Investigate insects, worms, and other small creatures that keep ecosystems healthy. Students explore life cycles, migration, and the role of helpful and harmful bugs.

**If you have a child that is in 1st grade or 6th grade and they would like to join please reach out and we might be able to accommodate if space allows.*
